Subsequently, Reverse Auction will be conducted amongst techno-commercially qualified / approved bidders after Opening of Financial/Price Bids' online.

The Reverse Auction will be normally initiated after Opening of Price Bids. There will be no participation fees for Auction. Only such bidders - who have been found techno-commercially qualified as per requirements of the tender will be permitted to participate in the Reverse Auction.

After opening of the price (financial) bids, System displays L1 price based on either over all basis or item wise/lot basis automatically. Using this system provided price, which would be auction start price procuring entity will create Reverse Auction and publish the same.

The Techno-commercially qualified bidders will receive Auction information through SMS & email. The participating bidders get an opportunity to revise their prices (reduce in case of Reverse Auction ). It allows bidders multiple opportunities to offer a price.

- II. The lowest value quoted by the bidder will become the auction start price for auction and the participant bidders have to quote below the auction price.
- III. The Bidder would be allowed to bid lower than the opening price of auction in multiples of the decrement value mentioned in para V. However, bidder can only bid lower than the Lowest Bid .
- IV. The auction will be done on bid value (to be provided by bidder) which will be derived based upon cost as mentioned in para below. It is inclusive of any taxes, etc.
- V. The minimum decrement value will be Rs. 1,000.00 as mentioned in clause VII below. The reduction shall have to be made as per decrement value or in multiple thereof.
- VI. Bidders shall be able to view the following on their screen along with the necessary fields during Online Reverse Auction:
  - a) Current Bid Price in the Auction.
  - b) Start Price.
  - c) Decrement value.

At no point of time will any bidder see the names of other bidders, or the prices of bidders other than the lowest bid.

- VII. In case of Reverse Auction, in order to displace a standing lowest bid and to become “L1”, a bidder can offer a minimum bid decrement or in multiples of decremental value up to above Max Seal %.  
For ex : Current price :- Rs. 49,000 Decrement value: - Rs. 1000 System Defined Maximum Seal % :- 50, in this case a bidder can quote minimum decrement amount as Rs 49,000-1000= Rs. 48,000 and maximum decrement amount is 49000-24500- 1000=23500=24000\* .
- VIII. A bidder can continue to revise his bid till the auction ends. However, the Bidder cannot quote/Bid equal to the Leading / Lowest Bid. He must always quote lower than the Leading/Lowest Bid site.
- IX. The evaluation criteria is based on Price alone in auction. The Bidder who quotes the lowest evaluated Price is determined as the lowest bidder.
- X. System protects bid and bidder information till auction gets over and displays current L1 price to the bidder.
- XI. Initial period of reverse auction will be two hours in the slot of 10 minutes. There will be auto extensions of time every time by ten minutes in case of any reduction recorded in the last ten minutes. The reverse auction will come to a close only when there is no further reduction recorded in the last ten minutes slot in any site i.e. after 1 hour 50 minutes.
- XII. The log details of the entire reverse auction process will be generated by the system once the process of reverse auction is completed.
- XIII. If a bidder does not submit his bid in the Reverse Auction, the price quoted by him in the price bid shall be considered as the final price of that bidder in applicable site. The status of the bidder (L1, L2 etc) against each site shall be evaluated considering either the bid price submitted in Reverse auction or the Price quoted in the price bid, whichever is lower.
- XIV. Since, reverse auction is a sequel to e-tender, the process of finalizing the tender upon completion of reverse auction will be same as the tender process without reverse auction.
- XV. The bid history shall reflect only the bid value inclusive of taxes. The value will not be same for two bidders even if any bidder makes such an attempt in the bidding.

- XVI. Only the chronologically last price bid submitted by the bidder till the end of the auction shall be considered as the valid price bid of that bidder for the site. Any bid submitted earlier by the bidder prior to submission of his last bid will not be considered as the valid price bid.
- XVII. Server time shall be the basis of Start time & Closing time for bidding and shall be binding for all. This would be visible to all concerned.
- XVIII. All electronic bids submitted during the reverse auction process shall be legally binding on the bidder. The chronologically last bid submitted by the bidder till the end of the auction will be considered as the valid price bid offered by that bidder against that site and acceptance of the same by HURL will form a binding contract between HURL and the bidder for entering into a contract.
- XIX. If the lowest price received during reverse auction is unreasonable or it is unacceptable on ground of being too high compared with estimated price, the HURL management reserves right to seek justification of the price from lowest bidder. If the price is not considered reasonable, HURL may not accept such bid and may go for another tender process.
- XX. In case of disruption of service at the service provider's end while the RAP is online, due to any technical snag or otherwise attributable to the system failure at the server end, the RAP process will start all over again. In such a situation, the last recorded lowest price of prematurely ended RAP, will be the 'Start Bid' price for the restarted RAP. The prices quoted in the prematurely ended RAP will be binding on all the bidders for consideration, if the restarted RAP does not trigger within the stipulated time.
- XXI. However, if Reverse Auction does not lead to any bid, HURL shall reserve the right to award the job based on the lowest prices quoted in online commercial bid.
- XXII. The successful bidder needs to submit the revised BoQ in line with price quoted by him in reverse auction. The ratio of percentage decrease in cost of each component shall be same as the overall percentage reduction in the bid value originally quoted by successful bidder and final L1 value quoted by successful bidder against the site.
- XXIII. The detailed Break-up of offered cost, provided by the successful bidder shall be considered and order, if placed, shall be with the same break-up of prices. The successful bidder(s) after reverse auction will be responsible to ensure that the rate as per the breakup of prices provided by him after the reverse auction and total value offered by him in the reverse auction are in same proportion. The successful bidder will not be allowed to increase the rate of any component while submitting
